## SUMMARY

Motivated and detail-oriented professional with strong skills in various programming languages. Quick to adapt and eager to contribute to a dynamic, growth oriented environment. Strong communicator with a passion for continuous learning and development.

---

## WORK EXPERIENCE

### MERN Stack Trainee , Srishti Innovative

07/2024 -12/2024

- Learned MERN Stack development and Gained expertise in creating dynamic user interfaces using React.js.
  - Built and managed RESTful APIs for server-side operations with Node.js and Express.js.
  - Acquired skills in database management with MongoDB, focusing on schema design and data integrity.
  - Worked on real-time projects, enhancing debugging, testing, and version control proficiency using Git.
- 

## PROJECTS

### TODO (2024)

Developed a Todo web application using the MERN stack, enabling users to create, manage, and track tasks effectively. Integrated user authentication, data persistence, and real-time updates to enhance user experience.

### Smart Parking Locator (2024)

Developed a web-based platform integrating automotive service locator, information provision, spare parts provider, and parking facility booking using MERN Stack. Enabled location-based searches, appointment scheduling, detailed service provider profiles, and parking bookings. Streamlined the process of locating, booking, and managing automotive services for vehicle owners, delivering a user-centric experience.

---
